

Quality Policy of Kalenborn Kalprotect GmbH & Co. KG

1. Customer Orientation

Together with and for our customers, we develop customized wear protection solutions. Our priority is to maintain the long-term value of the customer's system. The positive assessment of our products and services by our customers is our incentive.

2. Employees

All our company's employees contribute to the quality of our products and services. By incorporating the skills and competences of all employees, we strengthen the development opportunities and sense of responsibility of everyone. We can only achieve our goals with motivated employees.

3. Technology/ Quality/ Costs

Mastering the individual technologies is important for our technical products that require explanation. We implement the requirement in a targeted manner in our value chains. This also includes modern, state-of-the-art quality management. Through technology and quality leadership, we are convinced that we can also realize cost leadership.

We manufacture our wear protection solutions in our own production facilities in accordance with economic principles. To this end, we use optimized production processes that are safeguarded by compliance with high quality standards.

4. Continuous Improvement

Based on current knowledge and possibilities, we endeavor to constantly develop ourselves further. We do this based on a practiced continuous improvement process with a strong focus on research and development.

5. Success

We see our success in the appreciation of our satisfied customers of all elements of our range of services.

Our aim is to be the world's leading supplier of complete solutions for wear protection by consistently implementing our expertise.

SGU Safety, health protection and environmental policy of Kalenborn Kalprotect GmbH & Co KG

1. Employees

The health and safety of our employees and our subcontractors is our top priority.

Our employees, the people in our neighborhood and the environment should not be harmed by our activities.

It is the task of all employees to behave in a safety and environmentally conscious manner on an ongoing basis and to ensure continuous quality. The QM department is responsible for the introduction, monitoring and effectiveness of the management system.

2. Security

Safety, health, environmental protection, quality and economic success are equally important corporate goals.

Creation of an optimal and safe working environment, working conditions and work equipment, taking occupational health and safety into account

3. Environmental Protection

Avoiding waste is a declared goal of our actions. In addition, everyone is called upon to comply with the disposal routes and to separate and dispose of waste properly.

4. Quality

The high level of occupational safety, health and environmental protection and the high quality of our services are important foundations for the long-term development of the company.

5. Success

We occupy a leading position in the market and are one of the best suppliers in terms of safety, health, environmental protection and quality.

The basis of our success and our future potential are satisfied customers in all areas of industry, trade and commerce. Our motivated and qualified employees and quality and price-conscious suppliers.
